**EXAMINER'S AMENMENT**

*The Examiner initiated a telephone call with the Applicant's representative (Mr. Mark J. Rozman 42,117) on 2/21/07. The examiner informed the Applicants that with the new amendment the only claims 1-7 could remain rejected. The Examiner inquired whether the Applicant would be willing to amend the independent claim 1 to include the allowable subject matter similar to the one indicated in the newly amended claim 32. The Applicant agreed to the above proposal and authorized the Examiner to perform an examiner's amendment. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.*

**Examiner Amendment**

*Please do the following amendment:*

**Claim 1:**

*Line 2, replace "comprising" with --is to utilize--*

*Line 10, replace "memory." with --memory; a trust coprocessor to determine if the process is trusted, wherein the address overload circuit to be controlled by a control signal from the trust coprocessor--*

**Claim 9:**

*Line 2, replace "comprises" with --is to utilize--*

**Claim 26:**

*Line 6, replace "comprising" with --that utilizes--*

**REASONS FOR ALLOWANCE**

*The following are the Examiner's statements of reasons for allowance: The prior art does not teach or suggest the combination and relationship between these features:*

1. *The primary reason for allowance of claims 1-7 are allowed in instant application is the combination with the inclusion of the following limitations: **a trust coprocessor to determine if the process is trusted, wherein the address overload circuit to be controlled by a control signal from the trust coprocessor.***
2. *The primary reason for allowance of claims 9, 11, and 13-17 are allowed in instant application is the combination with the inclusion of the following limitations: **if the process is determined to be a trusted process, mapping the multiple-mapped memory to protected memory, copying the transfer agent to a second memory, transferring parameters from the process to the transfer agent, and controlling execution of the process with transfer agent.***
3. *The primary reason for allowance of claims 18, 22, and 24 in instant application is the combination with the inclusion of the following limitations: **if the process is a trusted process, transfer, at least temporarily, control of the process to a transfer agent and transfer process parameters to transfer agent; identify and execute a***

**protected function; and copy the transfer agent from nonvolatile memory to volatile memory in the course of executing multiple-mapped memory.**

4. *The primary reason for allowance of claims 26, 29, and 31 in instant application is the combination with the inclusion of the following limitations: **a circuit coupled to the trust co-processor to map the multiple-mapped memory to the protected memory, the circuit comprising an address multiplexer, an address translator coupled to the address multiplexer, and a data multiplexer, wherein the address multiplexer and the data multiplexer are to be controlled based on an output of the trust co-processor.***

5. *The primary reason for allowance of claims 32-33 and 37-38 in instant application is the combination with the inclusion of the following limitations: **a trust coprocessor to determine if the process is trusted, the address selector and the data selector are to be controlled by a control signal from the trust coprocessor.***
